

New Members

The following members have been added to the Society's rolls since the February, 1982 cutoff date for the 1982 *Directory for Members* published in May. Also listed are those reported as deceased since then. The designations of grade are the same as those used in the *Directory for Members*. An up-to-date list of the Sustaining Members appears on

the outside back cover of each month's *Journal*. The members listed below complete the Society's rolls as of September 20, 1982.

The *Directory for Members* shows the geographical membership distribution within each Section.

Honorary (H) Life Fellow (LF) Life Member (LM) Active (M)
Associate (A) Student (S)

Deceased:

Victor H. Allen (H)
A. F. Anderson (A)
Peter Boyko (F)
Thomas Callahan (M)
Barnett Dimond (A)

Robert E. Gottschalk (F)
William D. Hedden (F)
Patrick D. McGahan (A)
Boris Konoplev (F)
Pierre Mertz (H)

Dr. Harry F. Olson (LF)
Edgar A. Schwarz (M)
Arthur Carrington Smith (LM)
Edward Stanko (LM)
W. H. Taylor, Jr. (M)

Edward M. Tink (A)
William G. Wilson (A)
Charles B. B. Wood (F)
V. K. Zworykin (H)

THE COUNTDOWN HAS STARTED for Direct Broadcast Satellite Engineers!

Satellite Television Corporation is launching a large and very challenging enterprise...the development of a new Direct Broadcast Satellite Service designed to bring home subscription television to the American people. Outstanding ground floor opportunities at our Washington, D.C. facility will give you responsibility and high visibility in a field with broad technical and management horizons.

SENIOR DIGITAL ENGINEER — BSEE

Individual will provide digital engineering for the STC LSI descrambler module development and function as the STC technical representative during LSI design and production. Individual will supervise the following: design and production of STC encryptors for the Broadcast Center, product improvement projects, and implementation of STC Broadcast Center Monitor & Controls Systems.

Position requires knowledge of circuit design, D/A and A/D converters, digital telecommunications and video techniques and LSI design, plus 9-12 years of experience with design and production of digital circuits and LSI implementation.

SENIOR BROADCAST ENGINEER — BSEE

Individual will play a major part in design, specification and implementation of broadcast systems to be incorporated into STC's Broadcast Center complex. This will include extensive and advanced automated program facilities, editing facilities, and program production facilities. This individual will also be involved in equipment evaluation and selection as well as participate in industry development of emerging new technologies such as teletext and high definition television.

Position requires a minimum of 5 years of broadcast project experience. Candidate should have established familiarity with state-of-the-art broadcast video equipment and technical standards. Design, testing and implementation of complex video systems using latest construction techniques is also required.

SENIOR SYSTEM DESIGN AND DEVELOPMENT ENGINEER — BSEE, MSEE

Individual will participate in the design and development efforts at STC in the area of baseband signal processing and signal design for the video, audio, data and control information related to STC's signal format. This individual will prepare system technical requirements and specifications for the DBS Home Terminal signal processor; exercise computer and analytic models and develop various baseband signal processors for DBS Home Terminals; and develop test and evaluation plans for subjective and objective video tests of signal processing prototypes.

Position requires 5 years of video-signal processing experience. Candidate will be familiar with the state-of-the-art and be able to do independent design and development work.

SENIOR TELEVISION SYSTEM ENGINEER — BSEE, MSEE

This is a key position in the engineering group that is responsible for advanced television system technologies, including the research and development in video-signal processing and high definition television/enhanced definition television. The engineer in this position will also participate in high definition television transmission experiment through satellites. Individual should have a record of accomplishment in digital and/or analog TV signal processing so as to make significant technical contributions.

Position requires 5 years of experience in television signal processing and experience in prototype development is desirable.

In addition to the opportunities shown above, we have many other satellite engineering positions available.

Satellite Television Corporation offers a competitive starting salary as well as liberal fringe benefits including Retirement, Medical/Dental coverage, ESOP, Savings Plan, Credit Union, etc. Interested applicants should send resumes, including salary history, to Sheila Ryan, Dept. MPE-83, STC-COMSAT, 950 L'Enfant Plaza, SW, Washington, D.C. 20024.

**Our service
is scheduled to begin
in 1985.

OUR FIRST CHOICE

“We looked at several different ECP-2A processors,” said Ana Holmes, President, Frank Holmes Laboratories in San Fernando, CA, “before making our selection.”

When the cost of converting an old processor almost equaled the cost of a new one, it was time for some careful evaluation. And that is exactly what Mrs. Holmes and Lab Manager Les Meek did. They attended trade shows, visited manufacturing facilities, and listened to proposals. Their first choice . . . an Allen. Not only were they impressed by Allen's quality construction, but they also liked the automatic controls and a unique design feature that allows them to expand the machine's capabilities as their volume grows. But Allen's reputation for making quality equipment is only part of the story. Allen is also known for its great service and technical support. For details, request literature or talk with an Allen Rep.
