ADS digital video still store

A digital color video correction system has been announced by Asaca/Shibasoku Corp. of America, 12509 Beatrice St., Los Angeles, CA 90066. The system corrects color tones by adjusting each RGB channel's gain pedestal, gamma as well as the composite signal's total gain, setup chroma level, hue, etc., for a total of 13 settings.

The firm also announced the ADS-1000 digital video still store featuring a high-speed digital memory and an 8-in. Winchester Disk Drive. The system can store up to 218 fields of still pictures on one disk unit. By adding a maximum of four disk units, a total of 872 fields can be recorded. Features of the ADS-1000 include visual sorting of up to 16 pictures at one time, instant replay of still pictures (1 sec), and a built-in floppy disk to store pictures temporarily if the fixed disk is at capacity.

VII signal source 1202

Three CCTV test-pattern generators, the Signal Source 1202, 1212, and 1222, have been announced by Visual Information Institute, Inc., 719 Lower Bellbrook Rd., Xenia, OH 45385. The generators provide TV-display test patterns plus features such as pattern polarity, resolution mode, dual scan rate, and front-panel control of video level. RGB color output capability is included. Signal Source 1202 is designed to provide flexibility. It is priced at \$5500. The 1212 has clocked pulses and patterns

# 0 to 15x in less than 2.0 seconds

Not only is it fast, the **WESTREX** ST.6000 film transport is accurate! It interlocks to any ATR, VTR, or telecine with ease, because it has the intelligence for exact, editorially precise, control.

Hit STOP, and the ST.6000 stops on that exact portion of the frame, not 30 feet down the road like other film machines.

Check it out... **FILM NO LONGER LIMITS THE SYSTEM!**
