The new Pacex XR water recycling system with on-site, on-line resin regeneration and silver recovery, has been announced by Pace International Corp., 3727 S. Robertson Blvd., Los Angeles, CA 90230. Processing laboratories can recycle water without the inconvenience of returning ion-exchange resin bottles to a service facility for regeneration. Resin bottles that are ready for regeneration need not be moved from the system. They can be regenerated in place by simply turning the designated valves and switches. The system is available in capacities from 15 to 90 gallons of process water/min. On systems with more than 15 gallons/min capacity, one set of resin bottles can be regenerated while the balance of the system remains on line recycling photo-processing wash water.

Erratum

September 1984 *Journal*, p. 862

SMPTÉ Sections Training Seminar

The caption on the bottom of this page erroneously identified the center figure in the photograph. The caption should read as follows:

Donna Foster-Roizen, Chairman, San Francisco Section (L), John Carlson, Secretary/Treasurer, San Francisco Section, and Sherwin Becker, Section Vice-President.

We regret that Mr. Carlson was not identified correctly, and that his name did not appear on the list of attendees at the meeting.
