V-8 switcher, FSR, Inc.

The V-8 switcher, an 8-channel (8 into 1) video switcher has been announced by FSR, Inc., 40 Commerce Rd., Cedar Grove, NJ 07009. The device, which can be remotely controlled, switches one of eight video lines to an output, leaving all other lines terminated into 75 ohms. A companion unit, the A-2, can switch eight audio lines into one.

MS-1000 Mini Switcher, Comprehensive Video Supply Corp.

The Mini Video Production System™, announced by Comprehensive Video Supply Corp., 148 Veterans Dr., Northvale, NJ 07647, provides special effects and is designed for use in nonstudio environments. The system is offered in two configurations, each of which contains two-camera switchers. The MS-1000 Mini Switcher makes quick-cuts or dissolves between two cameras. Weighing 22 oz, it can be worn on a belt clip. The MS-2000 features the built-in quick-cut and dissolve effects of the MS-1000 plus built-in horizontal, vertical, and corner wipe effects, loop-through video, preview and genlock outputs, in addition to VCR output, audio-follow-video for automatic audio mixing, and internal video termination.

Portable microwave systems in the 2 and 2.5-GHz bands for local origination programming have been announced by M/A-COM MVS, Inc., 63 Third Ave., Burlington, MA 01803. The same equipment is used by broadcast TV stations for ENG and special events coverage. The basic system consists of a small, portable transmitter designed for tripod, bucket truck, or mast mounting. Camera and microphone outputs are connected directly to the transmitter control unit. At the central receive site, the Omnipole™ antenna picks up the signal. Its LNA output feeds directly to the receiver, easily accommodating ranges of up to 20 mi. The antenna can be mounted on a tower or rooftop for operator-free 360° coverage.
