Books, Booklets, Brochures

Wonderful Inventions: Motion Pictures, Broadcasting, and Recorded Sound at the Library of Congress presents the colorful histories of film, radio, and television. This hardcover publication from the Library of Congress links the past with the present through a series of illustrated essays that trace the mass entertainment media from the silent film era to the present age of sophistication and diversity. Two 12-in. records accompanying the volume present notable examples of Hollywood film music. Over 60 musical examples, more than 400 photographs, frame enlargements, and other illustrations are included. The price of the publication is \$40. Send prepayment to Dept. 36-MG, Superintendent of Documents, Washington, DC 20402.

Twenty-five Years of Reverberation is a 20-page, four-color booklet containing technical articles on studio reverberation units. This special issue of the EMT "Courier" chronicles the continued technical development of the reverberation unit, from its inception as a rectangular steel plate in 1957 to the EMT 252, introduced this year. The booklet is available free from EMT dealers. Those interested can also write to Gotham Audio Corp., 741 Washington St., New York, NY 10014. Include \$1.00 for handling.

The Society of Women Engineers (SWE) has announced the publication of "A Profile of the Woman Engineer 1984." This report, published by the SWE every two years, is a compilation of data obtained by surveying the non-student members of the Society during the winter of 1983-1984. Statistics found in the survey pertain to educational level and degree fields, employment information, salary information, and general characteristics. The report can be obtained by writing to SWE, 345 E. 47th St., New York, NY 10017. The price is \$5 for SWE members; \$10 for nonmembers.

A catalog of Matthey miniature video filters, is available from Television Equipment Associates, Inc., Box 393, South Salem, NY 10569-0393. This fully illustrated catalog lists the whole range of these filters including K-rating data for PAL and NTSC systems plus cutoff slope ratios to ease the selection process. Filters designed specifically for teletext signal processing are also described.

COMPLETELY NEW angénieux 10x25 HP

the Ultimate Cine Lens

For years, the Angénieux 10x25 has been the industry's workhorse. Now, by combining state of the art computer design and engineering, Angénieux has created a *totally new* 10x25. New optics, new mechanics! It's the finest 10:1 lens ever made for 35mm motion pictures.

Angénieux, world famous for superior optics, has given the new 10x25 a fast T3.7 aperture and a fixed non-rotating front element to permit the use of matte box, polarizers, and special effects filters. Angénieux uses a new fluo-phosphate glass formula which is further enhanced by our 99.8% High Efficiency Coating to create higher contrast images which are dramatically sharper. Our "zero defect" quality program delivers uniform perfection from lens to lens.

At Angénieux, excellence isn't just a word—it's our heritage.
