ROUGE, LA. 70817. TEL. 504-292-8287. ALSO
SELLING OPTICAL X-MOD. TEST GEAR.

Shibasoku Corp. of America, 12509 Be-
atrice St., Los Angeles, CA 90066. The
VS13AO can produce signals ranging
from 200 kHz to 150 MHz. Two variable
and six fixed markers are provided. The
fixed markers can be set to any frequency
by using the built-in frequency counter.
Adding sync and blanking signals allows
sweeps synchronized with the V of the
sync signal. The sync component can then
be added to the output signal. Outputs can
be displayed on an oscilloscope or an X-Y
monitor. The VS13AO is available in
NTSC and PAL.

A range of magnetic heads has been an-
nounced by Transound International,
16225 Antietam Dr., Baton Rouge, LA
70817. Intended for use in the film, televi-
sion, and videotape industries, the heads
are available in various formats, impe-
dances, mechanical parameters, and
screening.

Christie Electric MaxERASE-16A

A video/audio tape degausser called Max-
ERASE-16A has been announced by
Christie Electric Corp., 20665 Manhat-
tan Pl., Torrance, CA 90501. It is de-
signed for widths from 0.25 to 2.6 in., up
to 16 in. in diameter. It can erase high-
coercivity bulk tape up to 1500 Oe in a 30-
sec automatic 1-pass operation. The Max-
ERASE-16A is designed for continuous
duty use without overheating the unit or
the tape.

Three new VHF power tubes have been
developed by Varian EIMAC, 301 Indus-
trial Way, San Carlos, CA 94070, for VHF
power amplifier applications. The EIMAC
4CX7500A and 4CX3500A are compact
ceramic-to-metal, radial beam power te-
trodes intended for service in RF linear
power amplifiers and in VHF-TV linear
amplifiers. The tube is forced-air cooled
with an anode dissipation of 3500 W. De-
signed for maximum RF operating effi-
ciency, the tube operates at full ratings to
220 MHz. For FM broadcast service
(88-108 MHz); the 4CX3500A is used in
the EIMAC CV-2225 cavity. Power output
in this cavity is 5000 W with a stage gain
of 18 dB. A new compact high-mu power
triode, the EIMAC 3CX800A7, is in-
tended for use as a cathode-driven Class
AB2 or Class B amplifier in RF applica-
tions including the VHF band.

**PRC
exclusive!**

**First
again!**

We do for the film case what no one else dares to do...

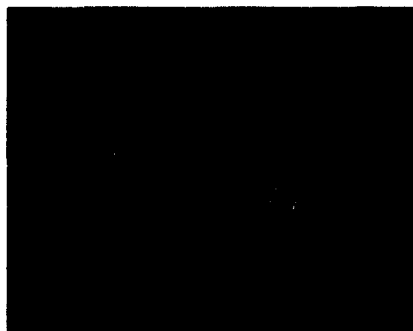

For years the PRC registered trade name of Plio-Magic® has stood for quality. For truly durable and reliable 16mm film storage and shipping cases that cut shipping costs . . . reduce handling . . . and eliminate the expense of constant replacement.

So, at PRC, we decided to give a product warranty that was in keeping with our reputation — a 2-year guarantee. **From now on, we will engrave on every Plio-Magic film case we produce a date of manufacture (see photo). If anything goes wrong with our case due to manufacturing defects within 2 years of that date, we'll replace it for you absolutely free!**

Plio-Magic cases give you so much more! Our patented failsafe Positive Action Lock takes less time to open and close than straps and buckles. No slides to fumble with!

No springs to struggle with! And there's a wide choice of colors to choose from.

For a copy of our latest PRC catalog, along with prices and the availability of special colors and imprinting, call or write the nearest PRC office listed below. ALL WITH THE 2-YEAR GUARANTEE NO ONE ELSE OFFERS.

This is the stamp that tells you exactly when your Plio-Magic case was manufactured!

Growing bigger to serve you better. In order to serve you even more promptly and efficiently, we've enlarged and enhanced our Eastern region services with the addition of a brand-new facility at Lyndhurst, New Jersey — it's been designed to meet the special needs of film/tape users and post-production operations.
