ALPHATIZED TYPE SIX

Technical Film Systems FC-5 continuous film cleaner

The FC-5 continuous film cleaner has been introduced by Technical Film Systems, Inc., 9205 Alabama Ave., Chatsworth, CA 91311. The compact cleaner (10×6.5×8.5 in.) can be installed on film printers, telecine chains, and high-quality projection systems. Since the film is cleaned continuously, there is no need to clean negatives and interrupt the printing operations. The FC-5 is available in 16, 35, and 70mm formats.

Winsted D8911 dubbing console

The D8911 dubbing console has been introduced by The Winsted Corp., 9801 James Cir., Minneapolis, MN 55431. The console features a compact and narrow design, yet can accommodate up to eight 1/2 or 3/4-in. front-loading VCRs plus electronics. The dubbing consoles may be used individually, or can be bolted together to create a bank of in-line duplicating racks.

Videotape: The Weakest Link

This tape failure doubled the cost of an already expensive video production.

To the producer, this shot became much more expensive and complicated than planned... all because the videotape quality was unknown before use.

Why wait for disaster to strike your video productions because of unknown tape quality? Prevention costs much less. RTI's new TapeChek 6120 is the world's top performing evaluator/cleaner for 1" videotape, specifically designed for professionals who demand superior tape performance.

With TapeChek you are assured that every inch of videotape is up to the high standards you expect from 1" tape. At 20 times standard play speed, the TapeChek 6120 accurately and thoroughly evaluates, inspects, cleans and polishes all blank or prerecorded tapes. Advanced 20 track MicroPulse detection electronically identifies dropouts. Plus, it can provide physical evaluation of prerecorded tapes without erasure. TapeChek's precision vacuum-assisted cleaning system substantially reduces temporary dropouts caused by loose oxide and dirt. Tape condition is graphically displayed by color CRT while a hard copy printer reports type and location of dropouts and damage.

Why risk increased production costs and lost revenue because of unknown tape quality? For complete information call:

1-800/323-7520.

In Illinois, call: 1-800/851-4028.

From Alaska, Hawaii and outside the U.S.A., call: 312/677-3000.

4700 Chase Avenue
