

Matthey ELECTRONICS

VIDEO FILTER

FILTER OUT HIGH COSTS AND ALIASING

"601 compatible" is today's target for modern digital Y U V video equipment manufacturers. Getting the digital interface right has been target number one. Then comes the 601 spec. Video Filters. Because of their complexity, cost and size, Matthey has introduced a new set of smaller filters: "LC.422" aimed at Lower Cost 4:2:2 standard equipments.

The templates are right: 5.75MHz Y channel and 2.75MHz U/V channels, with the required 601 attenuations at the half sampling frequencies.

The "LC.422" Filters perform anti-aliasing and interpolation with sin x/x included, all inside 40 pin DIL modules, all at lower costs.

The program offers extensive list management capability, automatic list cleaning, and automatic assembly. Edit Cutter, like the Edit Master, works with either time code or control track. It has a 900-edit internal memory to store and generate edit decision lists.

With Edit Lister, which Comprehensive has developed in version 3.1, a user can speedily and accurately compile, manage, clean, and transfer edit decision lists. The Time Code Reader Card is an option for the Edit Lister program. D-Link takes edit lists created by Edit Master, Edit Cutter, or Edit Lister and transfers them to CMX-compatible 8-in. disks.

Century Precision Kinoptik 35mm lens

A 9.8mm Kinoptik lens for 35mm motion-picture cameras has been introduced by Century Precision Optics, 10713 Burbank Blvd., No. Hollywood, CA 91601. The system has been engineered with a modified focusing mount, which reduces the minimum focus to 1 in. from the front of the lens. The 9.8mm Kinoptik also features integrated follow focus, iris gear, and glass filter holder. Century Precision Optics is also offering (as an accessory) an adapter that increases the coverage of the lens by 30%.

Telemetrics Model 68060 camera mount

An overhead camera mount has been announced by Telemetrics Inc., 7 Valley St., Hawthorne, NJ 07506. The Model 68060 is a linear trolley-track mechanism that is dc-powered by a free-standing remote-control unit. The unit has joysticks that control lens focus, zoom, pan, tilt, and other functions of the attached camera. The Model 68060 is available from the manufacturer in a variety of lengths starting from 5 ft.

NEW FROM
Frezzi
PAG I.I.

Charges BP-90s directly, or NP-1 and "On-Board" battery packs through available adapters.

Automatically fast-charge nicad battery packs from auto cigarette lighters or ac lines — anywhere in the world —

■ **AC Model** automatically selects AC line inputs from 90v. to 280v. Fast-charges and balances any make of 12v.-14v. nicad battery pack with 1.5ah-12ah output capacities. ■ LED indicators display status ■ Weight: 2 1/2 lbs. ■ 2 5/8" H x 4 1/2" W x 8" long.

You can do it with The Newest microcomputer — controlled chargers exclusively from Frezzi™

■ **In-Car Model** plugs into auto cigarette lighter for 12v. DC input. Fast-charges and balances any make of 12v.-14v. nicad battery pack with 1.5ah-12ah output capacities. ■ LED indicators display status ■ Weight: 2 lbs. ■ 2 5/8" H x 4 1/2" W x 8" long.
