## DVD Recorder

Panasonic has announced the availability of the LQ-DRM200 DVD recorder. The progressive-scan LQ-DRM200 offers a rear-mounted serial remote control terminal that permits it to be controlled externally, as well as to confirm sent commands. The recorder features a BNC-type connector on the video output that allows it to easily connect to professional monitors. It can record for up to six hours and provides four different recording speeds, varying in recording quality and length. Once video is recorded to DVD, it is instantly accessible and ready to view without having to search, rewind or fast-forward. The DVD recorder allows users to easily navigate, edit scenes, and create custom playlists of digital content on a DVD disc. It also offers a programmable auto renewal recording function that can be programmed to automatically record video, such as a satellite feed, at a specific time daily or weekly.

## LCD Monitor

Panasonic has announced the expansion of its broadcast-grade flat panel display product line with the immediate availability of the BT-LS1400 14 in. 4:3 aspect ratio LCD monitor. The BT-LS1400 is especially suited for use in desktop video editing and in mobile production vehicles. Offering a high brightness of 450 cd/m<sup>2</sup>, a high contrast of 400:1, and a wide viewing angle of 160° horizontally and vertical-

ly, the BT-LS1400 is also equipped with a complete set of production-oriented display controls. Encased in a rugged metal cabinet, the monitor provides a fast video response rate of 16msec, assuring super-sharp moving images with no after-images or color shift. Other key features include: broadcast specification video performance, support of 4:3 and 16:9 aspect ratio viewing, D65 and D93 color temperatures, SMPTE color bar generator, built-in stereo speakers, tally light, and a GPI terminal for remote control.

## Projector

JVC has announced the availability of the DLA-HX1U projector. The three-chip D-ILA projector delivers the highest resolution in its class (1400 x 788) with a native 16:9 aspect ratio for a true high-definition (HD) home theater experience. Using three reflective 1.1-megapixel WXGA-PLUS 16:9 Direct Drive Image Light Amplifier (D-ILA) chips gives the DLA-HX1U superior color reproduction, better gradation, and smoother images over its single-chip counterparts. The DLA-HX1U accepts analog signals including 720p, 1080i, 1080/24sF~30sF and HDTV formats, ensuring compatibility with DTV/HDTV signals. It offers discreet IR codes and separate on/off remote control commands, allowing it to work seamlessly with multi-component control systems.
