

## HIGHLIGHTING SMPTE SUSTAINING MEMBERS

Sustaining members are a vital part of our organization. The financial assistance made by Sustaining Members, helps the Society in pursuing its educational and standardization goals. We highlight these members, as the Society continues to drive the industry forward with their support.

### Disney/ABC/ESPN - Gold Sponsor

ABC, Inc., is a multimedia company engaged in publishing, cable television, and broadcasting. In SMPTE-related areas, the company has an interest in, among other cable activities, the Arts & Entertainment Network, Lifetime, and ESPN. About one-half of all ABC employees are engaged in broadcasting activities at the company's eight owned television stations, nine AM and eight FM radio stations, various radio networks, and the ABC Television Network. At the television network, which is centered in New York with major supporting facilities in Los Angeles and Washington, D.C., the Broadcast Operations and Engineering Division is responsible for planning, installing, operating, and maintaining all technical facilities, and for the staffing and management of technical operating personnel.

### National TeleConsultants Inc.- Bronze Sponsor

National TeleConsultants maintains one of the largest television facility design practices in the U.S., providing a broad range of services in support of the complete planning, design, and construction of a wide range of television facilities. Clients include networks, broadcast stations, motion picture studios, and corporate users.

The company specializes in the integrated design of television systems and the efficient buildings in which they operate. This combined experience in the design of television systems and buildings is a unique asset.

The principals and professional staff all have had extensive experience within production, post-production, and television broadcast facilities, including design, operations, maintenance, and management. This greatly enhances the ability to optimize day-to-day as well as long-term operations and maintenance considerations in facility and systems design and installation projects.
