TELESTREAM

Telestream products simplify file-based workflows for the most demanding video professionals. Used throughout the entire digital media lifecycle, from capture to viewing, Telestream products include Pipeline video capture, FlipFactory workflow automation, Episode encoding, Wirecast live webcasting and ScreenFlow screencasting applications.

The new, solid-state **AJ-HPM110 P2 HD mobile recorder/player from Panasonic** adds native 1080/24p recording, a 1080/24PsF input/output and longer record times to the wide list of capabilities by its predecessor, the AJ-HPM100. The ultra-reliable AJ-HPM110 recorder is ideal for use in the field, studio or in mobile vehicles, because it offers master quality recording/playback in a wide range of HD formats, including 1080p (native), 1080i and 720p, and in SD. It records in intra-frame DVCPRO HD/50/25 and DV formats as well as full-raster 1920 x 1080 AVC-Intra (with the optional AVC-Intra board). And offers the flexibility of up/down/cross and aspect conversion.

The expanding family of **Sony's XDCAM HD Professional Disc system** now

includes new models that add the benefits of 50 Mbps 4:2:2 optical disc recording to a high-definition optical disc workflow. The new models include the PDW-700 2/3-in. CCD camcorder and the PDW-HD1500 recording deck, as well as the dual-layer 50GB version of Sony's optical Professional Disc media.

Users can record more HD content with the dual-layer disc—approximately 95 min at 50 Mbps, 150 minutes at 35 Mbps, and 200 minutes at 25 Mbps HD. With their fast file-based operations, superb picture quality and HD production flexibility, these new models are ideal tools for such applications as news gathering, production for TV dramas, documentaries, and mainstream entertainment programs.
