

SDVN

Software Defined Video Networking

Designed. Delivered. Deployed.

Over the past year, Evertz SDVN technology has been rapidly deployed throughout industry leading facilities all over the world. SDVN is built around Evertz 46Tb/s EXE video service router, a wide range of IPG media gateways and MAGNUM – Evertz advanced SDVN controller. Evertz SDVN is a powerful and flexible solution that allows broadcasters to easily adapt to new market dynamics and transition to all IP or hybrid architectures. Let us help you future-proof your facilities for the ever-changing and growing landscape of television.
