

Your 4K Toolbox

FiDO-4T

FiDO-4R

Extend Your 4K Reach

AJA's FiDO line of SDI to fiber optic transmitters and receivers are the ideal way to move signals over long distances without the need for repeaters or distribution amplifiers. The latest addition to the FiDO lineup takes this concept to the next logical step with the ability to handle up to four individual SDI signals in one lightweight, compact device. This is especially useful in 4K applications where four 3G-SDI connections are needed to carry 4K images. FiDO-4 can extend these signals up to 10km utilizing locking ST fiber connectors to prevent accidental disconnects.

4K2HD

4K to HD Down-conversion

Keep your 4K images looking great, even in HD.

Easily integrate 4K/UHD signals into HD workflows using AJA's high-quality down-conversion technology. The 4K2HD Mini-Converter provides both SDI and HDMI outputs for local monitoring and facility-wide routing.

Hi5-4K

Convert 4K between SDI and HDMI

HA5-4K

Integrate 4K HDMI and SDI workflows.

Integrate 4K HDMI and 4K SDI workflows easily with Hi5-4K and HA5-4K. With support for High Frame Rates up to 60fps, you can seamlessly combine professional SDI 4K signals with more affordable 4K HDMI equipment for whatever your workflow requires.
