

SDVN

Software Defined Video Networking

Designed. Delivered. Deployed. COTS.

Evertz' SDVN is a powerful video and audio routing platform that leverages 10GE/100GE COTS technology to allow broadcasters to easily transition to a hybrid or all IP based facility. SDVN features an extensive portfolio of COTS products including the **46Tb/s EXE video switch fabric** and **MAGNUM** control and orchestration software. Evertz' SDVN is the most widely deployed IP-Based solution and can be found powering many of the world's leading media organizations.
