

SDVN

IP SOLUTIONS

Designed. Delivered. Deployed.

With over 40 global installations of Software Defined Video Networking (SDVN), Evertz is the leader in the transition to IP with its COTS solutions. Our evEDGE, EXE switch fabric, MAGNUM control & Orchestration, advanced packet switches, and gateways allow customers to switch open-formats that are standards based.

Evertz award-winning **evEDGE** is the **second** generation SDVN based Edge Software Defined Compute and Routing platform. The **evEDGE** can operate resiliently in a standalone or core switch environment featuring Redundant Switch Fabric Technology with twice the compute, processing, and gateway density.
