

Streamline Your HDR Workflow

HDR Monitoring Made Simple

HDR is opening up new possibilities in broadcast, production, post and ProAV with support for increased dynamic range and lifelike color. AJA has the gear to get your workflow up to speed and monitor it with io 4K, KONA 4, KONA IP, Hi5-4K and Hi5-4K Plus.

HDR

HDR 10

Achieve natural, true to life color with a wider, richer range, including brighter whites and darker blacks than standard signals allow.

io 4K, KONA 4 and KONA IP

Monitor HDR footage for edit and color sessions with greater accuracy using HDR 10 HDMI infoframe output support in AJA Control Panel via AJA Desktop Software 12.5 and above.

Hi5-4K-Plus and Hi5-4K

Achieve pristine visual fidelity with support for HDR pipelines. HDR metadata is generated in accordance with HDMI v2.0a/CTA-861.3 via accompanying Mini-Config software.
