

# HDR | Image Analyzer 12G

## Waveform, Histogram and Vectorscope Monitoring for HDR

Create, master, deliver HDR with confidence.

HDR Image Analyzer 12G utilizes 12G-SDI single cable simplicity for 4K/UltraHD SDI workflows, providing precision tools for effective real time analysis and monitoring of HDR and SDR video across various color spaces including camera LOG formats. Featuring HDR capable monitor outputs that go beyond HD resolutions and incredible color accuracy for creating perfect video.
