

NEW SMPTE VIRTUAL COURSE

Understanding ATSC 3.0: NextGen TV and the Future of Broadcasting

Starting 12 April 2021

The development of NextGen TV using the new ATSC 3.0 standard is revolutionizing broadcasting with the newest video and audio formats, compression technology and internet data protocols. This virtual course provides an overview of the ATSC 3.0 standard, explains its core technologies, and highlights its new features and capabilities.

SMPTE's Virtual Courses let you sharpen your skills in the latest digital media technologies with SMPTE's Instructor-led courses or our flexible self-study option.
