

BRIDGE | LIVE

High Performance Multi-Channel
Video Encoding, Decoding, Streaming
and Transcoding for Live Video

12G-SDI to and from H.264, H.265, MPEG-TS and JPEG 2000

BRIDGE LIVE is a turnkey solution designed in partnership with Comprimato for critical UltraHD and HD streaming applications. It offers high performance 12G-SDI video encoding/decoding, stream based transcoding, flexible I/O, comprehensive metadata support and a compact 1RU form factor with redundant power supplies.

Designed with the ability to support both low latency and high quality workflows across a range of codecs, containers, and protocols, BRIDGE LIVE enables numerous use cases for professional streaming and encoding. BRIDGE LIVE powers multi-input live streaming to platforms such as AWS, YouTube, Facebook or Twitch, provides high quality reference video for remote collaboration in production and post, plus ABR ladder profiles or hand-off for OTT packaging, and all supported via public internet via SRT.

BRIDGE LIVE is available now at a breakthrough price.
Check it out at our website, or at your preferred AJA Reseller.
