

Bring the control room to you

Introducing the most comprehensive tool for remotely controlling your facility: **VUE Anywhere**. This tool allows operators to remotely control their facility over a network from any web browser, providing a real-time user experience with ultra-low latency over a low bandwidth LAN or WAN connection. **VUE Anywhere** combines individual control and monitoring elements such as router switching, audio/video processing controls, video/audio feeds and multiviewers in a single interface. When enabled with **VUE-APPS**, users can maintain their workflows in the control room – from home.
