## OG-DANTE-12GAM 12G-SDI/Dante Audio IP Bridge

### Dante Spoken Here: Bridge Up to 64 Audio Channels Simultaneously

OG-DANTE-12GAM is an openGear, Dante IP audio embedder/disembedder, with dual 12G-SDI input and output ports, primary and secondary 1GigE Ethernet ports, offering up to 64-channels of audio transport with DashBoard support.

OG-DANTE-12GAM marries professional SDI with the Dante ecosystem in a convenient openGear format.

Combining up to ten OG-DANTE-12GAM cards in an openGear frame offers up to an incredible 640 channels of uncompressed, low latency, audio bridging to and from 12G-SDI, and Dante audio over IP for 4K/UltraHD/2K, HD and SD workflows, ideal for the most demanding applications whether in Broadcast, ProAV, Post or Live environments.
