

# Remote Workflows Made Simple

## Powerful Streaming Solutions for all Video Formats

At a time when things rarely seem simple, look to AJA Video to provide reliable hardware and software solutions that can make remote workflows feel as straightforward as in-house. AJA offers a variety of options that remotely connect key staff in the production pipeline, for distanced review and approval, delivery, and contribution.

The AJA HELO offers high-quality H.264 streaming in a stand-alone portable device that is easy to deploy and operate, supporting the most popular CDN services including Facebook Live, YouTube, Twitch, and many more.

For the ultimate in professional streaming and contribution, the immensely powerful AJA BRIDGE LIVE supports 4K/UltraHD streaming in H.264, H.265, or JPEG 2000 to multiple destinations via the secure SRT protocol, via an easy-to-use web browser interface.
