

New Blackmagic Studio Camera!

New studio cameras include advanced broadcast features in a compact all-in-one design.

Introducing the world's most advanced self contained studio camera! Blackmagic Studio Cameras have the same features as large studio cameras, miniaturized into a single compact and portable design. Advanced features include talkback, tally, camera control, built in color corrector, Blackmagic RAW recording to USB disks and much more! You can even add a focus and zoom demand for lens control!

Revolutionary Studio Camera Design

The distinctive Blackmagic Studio Camera has the benefits of a large studio camera because it's a combination of camera and viewfinder all in a single compact design. The camera is designed for live production so it's easy to track and frame shots with its large 7" viewfinder. The touchscreen has menus for camera settings, and knobs for brightness, contrast and focus peaking.

Get Cinematic Images in Live Production!

The amazing 4K sensor combined with Blackmagic generation 5 color science gives you the same imaging technology used in digital film cameras. Plus, when combined with the built in color corrector you get much better images than simple broadcast cameras. The color corrector can even be controlled from the switcher. The resolution of 4096 x 2160 allows both HD and Ultra HD work.

Powerful Broadcast Connections

Blackmagic Studio Cameras have lots of connections for connecting to both consumer and broadcast equipment. All models feature HDMI with tally, camera control and record trigger, so are perfect for ATEM Mini switchers! The advanced Blackmagic Studio Camera 4K Pro model is designed for broadcast workflows so has 12G-SDI, 10GBASE-T Ethernet, talkback and balanced XLR audio inputs.

USB Expansion Port for Accessories

The Blackmagic Studio Camera features a high speed USB-C expansion port that allows you to record to external disks or connect accessories. Plug in an external USB flash disk and the camera can record high quality 12-bit Blackmagic RAW files for later editing and color correction. Plus the files are small and fast, so editing responsiveness is incredible!
