

BRIDGE | NDI® 3G

High Density HD and 4K/UltraHD NDI Conversion Gateway

Convert up to 16 Channels of SDI to NDI and NDI to SDI

The new AJA BRIDGE NDI 3G is a 1RU gateway device offering high density conversion to and from 3G-SDI to NDI and NDI to 3G-SDI for both HD and UltraHD. Designed to drop into any existing NDI or SDI workflow as a plug and play appliance, it's easy to deploy and administer. BRIDGE NDI 3G supports up to 16-channels of HD conversion or up to 4-channels of UltraHD.

BRIDGE NDI 3G brings immense conversion power and flexibility that's fully controllable remotely for live events, broadcast, eSports, education, and entertainment venues needing high-quality, efficient NDI encode and decode. Set and forget, or use more dynamically as project needs dictate with an easy to use user interface that's available locally or over the LAN via your favorite web browser.
