

Ki Pro® | GO2

The Most Advanced H.265 and H.264 Recorder

Introducing the All-New Ki Pro GO2

Ki Pro GO2 is an H.265 and H.264 multi-channel HD/SD recorder/player supporting up to 1080p 60 in a half-rack, 2RU unit. Record up to four channels simultaneously over 3G-SDI and HDMI straight to off-the-shelf USB 3.0 media, with a fifth USB port on the rear for backup recording. Genlock free inputs allow you to use a wide range of sources, from DSLRs to camcorders. Monitor all inputs on a single HDMI or SDI display with integrated Multi-Matrix outputs, and on the beautiful front display. Control all of this power directly on the Ki Pro GO2 or on any standard web browser.

Advanced features include network-based recording and support for SMB protocols via GigE network connectivity. NAS provides a central storage location for primary or backup recording channels independent of local USB storage. When used as the primary recording location, editors and graphics systems can immediately access the recorded files directly from anywhere on the LAN. AJA's amazing 3-year warranty and support is included.

Go ahead and experience the incredible features, reliability, and ease of use of the all new Ki Pro GO2. Available now at your Authorized AJA Reseller.
