

# XPS

## High Quality, Ultra Low Latency, Secure UHD/3G/HD Video Streaming Platform

The Evertz XPS Live Video Encoder/Decoder Series is a high-performance, low-latency contribution encoder built for remote and cloud-based production workflows. It delivers broadcast-quality UHD, 3G and HD video with HDR over any IP network – including 5G, public or private – while optimizing bandwidth efficiency. With secure streaming and ultra-low latency, it's the ideal solution for live sports, news and event coverage where mobility, reliability and quality are critical.
