ENGINEERED FOR MEDIA INTEGRITY

 evertz.io

# XCHANGE

## XPS

## REFLEKTOR

Unlock seamless live media workflows with our advanced transport solutions. The XPS Contribution Encoder transports high-quality, low-latency feeds at the edge, while Reflektor delivers real-time processing for normalization, SRT replication, and video/audio processing. The solution is centrally managed by evertz.io X-Change, our powerful cloud-based orchestration layer that simplifies operations with a unified interface, real-time monitoring, and dynamic routing—enabling efficient, scalable control across complex broadcast workflows.
