

FRCX

REAL-TIME LIVE FRAME RATE CONVERSION

Evertz' **FRCX-2000** is a broadcast quality and real-time frame rate converter between 59.94 and 50Hz frame rate families. The FRCX-2000 is ideally suited for international feed management applications requiring high quality and low latency conversion, including live sports, news, gaming and many more. In addition to high quality and artifact-free frame rate conversion, support for SDR/HDR processing, options for SDI and IP inputs/outputs, the FRCX-2000 is equipped with an integrated audio engine supporting up to 32 channels, offering an extensive list of audio processing capabilities while maintaining audio/video alignment.
