

Complex Signal Paths. Simplified by AJA.

Designed for Precision. Proven for Production.

Don't Create Legendary Content with Average Tools.

Create it with gear engineered by people who know what's at stake in a live signal path. Every frame, every pixel, every packet—flawless. AJA is proud to unveil our latest trio of industry-defining innovations:

IP25-R

This new 4K/HD IP video receiver supports up to four SMPTE ST 2110 video streams, output to 12G-SDI and HDMI 2.0. With NMOS, PTP, and redundant SFP28 supporting 10/25 GigE, it plays nice in even the most mission-critical environments.

BRIDGE LIVE 12G-4

Now with multi-channel 4K/UHD I/O, this next-gen encoder/decoder unlocks pristine bidirectional streaming, transport layer flexibility, and multi-platform delivery in a rock-solid 1RU chassis. Low-latency. High fidelity. Broadcast-grade resilience.

UDC-4K

The compact up/down/cross-conversion powerhouse does it all, including 12G-SDI and HDMI 2.0 signal conversion, frame synchronization, frame-rate conversion, and much more. From HD to 4K or anything in between. Small box. Big impact.
