ONE SUN— OR ONE THOUSAND?

LET the sun fall into San Pedro Harbor every evening if it will. It's out of date. Shines only half a day or so at a time. Modern studios need modern suns. They use National Photographic Carbons. These suns need no rest—give light day or night. National White Flame Carbons have the penetrating hard-light for long shots.

For colorful scenes, for close-ups, and for panchromatic film,

put the new soft-light National Panchromatic Carbons in your arc lamps. The light from these carbons is rich in red, orange and yellow-green rays. Gives correct tonal values for all colors. *Allows natural make-up.*

When pure sunlight is wanted, or for photographing night scenes, use National White Flame Photographic Carbons—their rays are identical to June sunlight.

NATIONAL PHOTOGRAPHIC CARBONS

White Flame and Panchromatic

NATIONAL CARBON COMPANY, INC.
Carbon Sales Division, Cleveland, Ohio

Unit of Union Carbide  and Carbon Corporation

Branch Sales Offices: New York, N. Y.; Pittsburgh, Pa.; Chicago, Ill.;

Membership

in the

Society of Motion Picture Engineers

is open to all who are engaged in any branch of the motion picture industry or allied work. The society is international in character and its convention papers with complete discussions are furnished free to members.

SEVEN REASONS WHY

YOU SHOULD JOIN

The Society of Motion Picture Engineers

- 1—The S. M. P. E. is an internationally recognized organization of Motion Picture Engineers.
- 2—The S. M. P. E. is becoming an ever more important factor in developing, stabilizing, and standardizing the motion picture industry.
- 3—At two conventions each year reliable data concerning a wide range of subjects is presented long before it becomes available elsewhere.
- 4—Papers read at conventions are printed with full discussions in "Transactions" and distributed free to all members *FOUR* times a year.
- 5—The S. M. P. E. affords unique opportunities for personal contact with leaders in the industry.
- 6—S. M. P. E. transactions are recognized standard authority on Motion Picture Engineering.
- 7—The S. M. P. E. will help you in many ways. Join now.—
