The Motor Generator That Produces Perfect Arcs.

Gives a steady arc, pure white light, two arcs in series and a perfect dissolve.

Arc amperage can be increased or decreased as desired.

Not affected by line variations.

Has self regulating voltage feature.

Quiet in operation, economical and reliable.

The 110 to 230 Volt D.C. to D.C.

is a rotary transformer type of machine having an operating efficiency of 80% and higher.

Has arcs in series, constant current, self regulating voltage and all other operating advantages of the A.C. to D.C. Transverter.

Will effect a great saving for theaters having D.C. power circuit.

The A. C. to D. C.
Transverter and Panel Board

JUST OFF THE PRESS

"The Standard Authority on Motion Picture Projection"

MOTION PICTURE PROJECTION

By **JAMES R. CAMERON**

560 Pages

Over 200 Illustrations

Shorn of All Technicalities Yet Complete and
Comprehensive.

READ WHAT CRITICS SAY:

Exhibitors Trade Review—"Is by far the most complete and most interesting book yet published on that subject."

N. Y. Morning Telegraph—"Written with the amateur in mind as well as the professional—those using motion pictures in churches and schools will be especially interested."

Bureau of Economics Dept. of Public Instruction, Washington, D. C.—"By far the most complete manual we know of. The most comprehensive work of its kind."

Motion Picture News—"In comparison with all other works on the market this book is in a class by itself. Should be in the library of every projectionist. The price is not a criterion of its worth."

Wm. C. Francke, Asst. General Manager Simplex Machine Co.—"Greatly impressed with book—far in excess of anything expected. Will do much to increase the life and efficiency of projection apparatus. Will be welcomed by progressive manufacturers, dealers and projectionists. Congratulate you on your achievement."

HUNDREDS OF OTHERS ON REQUEST

If you are interested in the motion picture business you need this book.

After comparative tests, Cameron's Hand Books were adopted by The American Red Cross, Y. M. C. A., Knights of Columbus and Community Motion Picture Bureau as the standard textbook on projection. It is being used by the U. S. Army and Navy authorities and most of the educational societies throughout the country.
